ACCESS CONTROL MANAGEMENT SERVICES (ACMS)

Unlike the typical purchase of access control system, which requires you to deploy dedicated personnel to manage and ensure the smooth operation of the system, Chase Security Solutions offers you ACMS as an alternative to on-site management.

Enjoy the ease of security operations having Chase Security manage the registration of staff movement and other additional requirements arising from your changing needs.

ACMS package includes:

- Supply of the Card Access Control System, which provides you with the control of access into your premises during and after business hours
- System commissioning and introduction
- Card supply and administration service
- Provision of transaction report on a monthly basis
- Comprehensive maintenance and enhancement of Access Control System software.
- Technical and Security Consulting support

The benefits are:

- Affordable monthly operational subscription fee rather than paying capital up-front for the security equipment and services.
- Save on time and resources as the system and card administration is carried out by Chase Security remotely.
- With supplied monthly reports there is no need to dedicate a person to manage and report on the system and therefore no need to employ or train extra staff.
- Free Comprehensive software maintenance is provided during the contract period.
- Parts that may be damaged due to wear and tear will be supplied at discount prices.
- Technical support so that there will be no compromise on the security.
- The ability to choose a competitive contractor of your choice for physical installation/repair or additions.
- No upgrades required to the equipment and software for the ongoing smooth operation of the system.
